KOLB STUDIOEQUIPMENT

MouldingPress

Description

The new StudioLine MouldingPress is a hydraulic press for manufacturing clay profiles. Almost every profile up to a diameter of 65 mm can be created by inserting a particular template into the locking head. In the new version the heater is located behind the locking head. Temperature is of course adjustable and therefore a high surface quality is assured.

The locking head is very easy to open and extremely robust. With a turning knob the feed speed is variably adjustable. The new stainless-steel control panel holds information about exact temperature and pressure.

For simple and convenient operation extrusion is activated by a foot switch. The foot switch is connected to the machine via a plug and can easily be unplugged if a replacement may be needed.

The StudioLine MouldingPress offers many storage possibilities for clay and templates with its fold away stainless steel worktop and the three built-in heavy duty drawers.

The moulding press can be supplied either with vibration dampers or rollers. Also included is a set of blank templates.

Technical specifications

- dimensions: length: 1,460 mm table closed
length: 1,900 mm table folded out
width: 600 mm
height: 1,140 mm
- weight: approx. 130 kg
- power: 230 V / 50 Hz; 2.2 kW; 10 A
