KOLB STUDIOEQUIPMENT

DynocTub

Description

The Kolb DynocTub is made of stainless steel and makes the handling of the wellknown painted foil much easier.

It is equipped with a temperature controlled heater, a circulating pump and a water filter in order to guarantee a long lasting water quality and consequently a long lasting quality of the prepared foil. Three built-in stainless steel rollers running on ball-bearings ensure that long lengths of foil can be easily handled when rolled on and off the unit. The electrical power is provided with a safety cut-out switch.
